

1. Give an example of an application where high recall might be more important than high precision. Briefly explain. Do not use the example from class. (5 points)

Many examples for this.

Anything where we care about identifying all the possible "yes"s allowing for some mistakes (FP) was accepted w/ reasonable justification

2. In the following sentence, underline and clearly indicate the portion that refers to recall and the portion that refers to precision. Briefly explain. (5 points)

I was telling her about the class she missed yesterday and I forgot to mention the quiz next class, and I accidentally told her there would be a quiz the following week.

precision.

lied. said something

false

(FP)

recall

did not recall something.

left something out (FN)
