Quiz Instructions

This quiz covers clustering. The questions are set up as essay questions. You can attach images to show your work. The quiz will take about 15-20 minutes, but I've given you 30 minutes to complete it in case you have technical difficulties.

Question 1

10 pts

Given the 1D data above, **run the K-Means algorithm until convergence** with $K=2$ and initial cluster centers of $\mu_1 = -4$ and $\mu_2 = 1$.

The data is numbered from 1-10 for your convenience.
